

Capability authority: CAP-SEPARATE-OBSERVATION-INFERENCE

What must be learned

Keep the observation separate from the chemical inference.

A smell, a pop test or gas evolution is evidence. The name of the gas is the inference supported by that evidence.

Rule: the claim must not say more than the recorded observation or test can support.

Governed reasoning structure

- Copy the observation or test result without interpreting it.
- Write the possible chemical inference separately.
- Link the evidence to the inference.
- Check that the inference is no stronger than the evidence.

Authority bindings

- Problem family: PF-EVIDENCE_TO_CLAIM
- Representation levels: MACROSCOPIC + SYMBOLIC
- Representation requirement: OBSERVATION
- PCK: observation-claim, first-move, verification
- Verification requirement: VERIFY_RESULT
- Scope class: SOURCE_DERIVED_CORE
