

Problem family: PF-EVIDENCE_TO_CLAIM

Source item U2Q15C - near/direct transfer demand

NCERT Class IX Science Exemplar - Unit 2 Q15(c)

What would you observe when a mixture of iron filings and sulphur powder is heated strongly?

- Primary capability: CAP-SEPARATE-OBSERVATION-INFERENCE
- Marking point: strong heating causes iron and sulphur to react.
- Marking point: a new substance, iron sulphide, is formed.

Source item U2Q35 - stronger transfer demand

NCERT Class IX Science Exemplar - Unit 2 Q35

Iron filings and sulphur are split into heated and unheated parts; dilute HCl is then added to both. The learner must identify the gases evolved in each case.

- Primary capability: CAP-SEPARATE-OBSERVATION-INFERENCE
- Heated part A: identify hydrogen sulphide from the governed evidence.
- Unheated part B: identify hydrogen from the pop test.
- The item requires keeping two evidence chains separate before making chemical claims.

Core2 ownership

Core2 owns the source ask, source identity, problem-family demand and answer authority. It does not decide how a learner-facing practice page is scaffolded.
